MISSION

The ESF Implementation Support Unit (ISU) was established to provide enhanced operational support to E&S Specialists for the application of the ESF in collaboration with OPCS, Regions and GPs. As part of that effort, this site aims at serving as a knowledge platform whereby specialists can find useful resources and information such as examples of good quality ESF documents, archive of ESF newsletters, materials from learning events, sample documents and case studies relevant to each E&S standard, and so on.

ESF ISU in collaboration with IT has created indicators and developed a system to help project teams with ESF issues. If the project team encounters any ESF issue, they flag it to the ESF team.

CAPACITY

TEAM

ESF Unit has environment and social divisions: Environment currently has 7 members and Social division has around 10 members.

WORKSHOPS/EVENTS

ESF trainings and clinics are organized for the headquarters staff every month.

SERVICES OFFERED
